

Trinity Valley Community College Guide for Potential Dual Credit Courses

Crosswalk Overview

This is a **guide** for cross-walking TVCC college credit courses with high school credit for dual credit. This crosswalk is derived from current practices within TVCC service-area Independent School Districts (ISDs), as well as other community colleges. Suggested crosswalks are not mandated. This document is not intended to dictate how local ISDs choose to award high school credit in a dual credit program (this authority is ultimately the ISD's responsibility). This crosswalk is based on the Foundation High School Graduation Plan.

This crosswalk includes the suggested high school course, the TVCC course, the TSI Requirements, and whether the course has prerequisite requirements for enrollment. These prerequisites and TSI Requirements are subject to change as state laws and college policies change. Check the current TVCC academic catalog for updated information. Please note that some courses listed in the crosswalk may be used in different endorsements than listed below.

Dual Credit

Courses taken through Trinity Valley Community College must be pre-approved by the appropriate official at the high school to receive dual credit. Documentation of this approval is presented during the registration period with a completed dual credit form. TSI requirements are for students who are not TSI complete in an area by other tests such as ACT, SAT, STAAR EOC, PLAN, or ASPIRE.

College Transfer Concerns

Points to consider when advising students concerning the transfer of college credits from one college to another:

1. It is the student's responsibility to check with the institution they plan to transfer to concerning the transferability of a course before they register for it. Some private universities will not accept college credit if used for high school credit (example: SMU).
2. Texas public colleges and universities generally transfer courses which have common course numbers and designations. For example: ENGL 1301 is a common course that all Texas public colleges and universities carry. If a course does not carry the same number or designation at the transferring institution, it may not transfer. The student should contact that receiving institution for confirmation. A quick reference guide for compatibility within institutions can be located in the Texas Common Course Numbering System (TCCNS), available at <https://www.tccns.org/>.
3. There are times when a course will be counted as a transfer between institutions; however, that course may not apply to the required courses needed for completion of a particular major. Transfer guides for most Texas institutions are available through the TVCC advisors.
4. Private and out-of-state institutions will decide which courses will transfer individually. The student must contact the private or out-of-state institution to determine if a course will transfer and how it will be applied.

ENGLISH LANGUAGE ARTS

Four credits. The credits must consist of:

(A) English I, II, III and Advanced English course

(B) English I and II for Speakers of Other Languages may be substituted for English I and II only for students with limited English proficiency who are at the beginning of intermediate levels of English language proficiency.

SCIENCES Three

credits. The credits must consist of:

- (A) Biology, IPC or an Advanced Science course, and Advanced Science course
- (B) The third credit may be selected from any of the following: Aquatic Science, Astronomy, Earth and Space Science, Environmental Systems, AP Biology, AP Chemistry, AP Physics B, AP Physics C, AP Environmental Science, IB Biology, IB Chemistry, IB Physics, IB Environmental Systems, Scientific Research and Design (CTE), Anatomy and Physiology (CTE), Engineering Design and Problem Solving (CTE), Medical Microbiology (CTE), Pathophysiology (CTE), Advanced Animal Science (CTE), Advanced Biotechnology (CTE), Advanced Plant and Soil Science (CTE) Food Science (CTE), and Forensic Science (CTE).

The following science combinations will satisfy the Life & Physical Science requirement:

BIOL 1406 and BIOL 1407; BIOL 1408 and BIOL 1409; BIOL 1411 and BIOL 1413; BIOL 1406 with any CHEM or PHYS; BIOL 1407 with any CHEM or PHYS; BIOL 1408 with any CHEM or PHYS; BIOL 1409 with any CHEM or PHYS; BIOL 1411 with any CHEM or PHYS; BIOL 1413 with any CHEM or PHYS
